## Chairman's Message

Dear Parent,

It gives me immense pleasure to welcome you to be a strong part of Bhopal Girls' School. It has been our constant endeavour to provide quality education, by keeping pace with the times and providing state of the art facilities to the students.

Bhopal Girls' School has always been a dream for me, to realize the vision of my parents into reality. What sets us apart is our dedication and desire to be the best. We also believe in cultivating these traits in our students.

With a committed teaching staff and infrastructure the focus is on the intellectual and psychological development of the girl child. It is our conscientious effort to always live up to the parental expectations.

## Principal's Message

Primary level of schooling is a unique phase in a student's life. During this time, students experience many physical and emotional changes that substantially impact their academic growth.

We are proud to offer our student an academic education of the highest quality along with numerous cultural sport and social opportunities with a caring and committed staff and in a discipline yet relaxed atmosphere. Our student's study within a frame work of security confidence and self development allowing them to prepare for the challenges of the future.

One vision statement "Excellence in Girls' Education" strives to develop each student to her full potential, through many programs and projects available. Bhopal Girls' School has achieved many success not only because of the corporate spirit which exists, but because of the many opportunities for all students to develop their diverse talents and interests. We encourage all our students to strive for excellence in their academic.

## Admission Procedure

Every student seeking admission in this institution will have to appear for an interview. For K.G. there will be Oral Test and for other classes there will be a written test. The minimum age required for admission in Nursery is 3 years, Admissions are purely based on First Come First Preference basis. A student seeking admission will first have to fill in a Registration Form and attach the required documents. Date of interview for all the classes as well as the written entrance test of other classes will be notified on the Notice Board of the School within a week. Date of the result of all the classes will be declared on the date of Entrance Test on the Notice Board. If the candidate is admitted, both the parents will have to visit the Office and fill in the required forms within three days of the declaration of the result, along with 4 copies of photographs of the student and a copy each of the parent of the student, In case the parents decide to keep a guardian also, they will have to deposit his/her photograph and make his/her signature on the Parent Card authentic. In case of default of this time limit, admission of the candidate may be rejected and student from waiting list may be given priority. Fee will have to be paid on the date of admission or else admission is likely to be cancelled.

## About our School

Situated at the Airport Road the school building is designed to provide an environment for Students for their mental stimulation. With spacious classrooms, painted in soothing colours, with airy windows and ventilation the infrastructure is built in a manner to allow a sense of freedom and abundance among the students.

The building also has all the modern educational elements like laboratories, computer center, auditorium, dining hall, modern kitchen and indoor play areas for co-curricular activities. The Preparatory classes are designed as per the needs of the tiny tots. Each class is designed with a difference to give the young ones a feeling of their playroom, as the method of teaching here is strictly through the play-way method.

The whole design and arrangements are planned to give the students an opportunity to develop and harness their potential, personalities with diverse capabilities and face the world with courage and confidence.

## About us

**The Mission :** Grooming of the physically tough, intellectually profound, emotionally balanced, socially amicable, morally upright youth to map out the next leg of life's journey.

**Our Goal :** "Excellence in Girl's education"

**Motto :** "Perfection through practice"

Any society that nurtures the girl child always prospers, because in a girl, Nature unfolds its pristine dreams. In the dreams of a girl one sees the vision of tomorrow. Visions that shape life. A life that is glorious and worthwhile, that leads humanity into a better world.

But dreams need foundation, Foundation of knowledge, foundation of skills and foundation of goods education. It takes a good and caring educational setup to provide the groundwork for the mental and psychological development of a child.

Education doesn't mean only keeping up the tradition but to move ahead of times, to spread the knowledge everywhere and to encourage the mind to board the flights of imagination.

Good education can only be imparted in a conducive environment. A good infrastructure coupled with all state of the art facilities is what needed to create an institution that cuts above the rest.

We believe that education should not be imposing instead it should be a tool to free the mind of its limitations and should empower everyone with courage and wisdom, especially the girl child who has a million dreams locked in her heart. She certainly deserves the best.

## Aims & Objectives

- Bhopal Girl's School has adopted the motto "Perfection through practice", to achieve the following objectives.
- To impart, all-round education, which will make students physically fit, mentally alert intellectually capable, emotionally balance, morally forthright and spiritually aware.
- To inspire, creativity among - students and encourage them to their innate talents and aptitudes through a pleasurable and adventurous learning process and help them visualize their future ambitions and make them strive hard towards actualizing their goals by continually excelling themselves.
- To inculcate practical thinking in students along with a sense of "discrimination and purpose" towards the actions they undertake so that they acquire knowledge and skills to weigh and consider outcomes with reasons and empathy and intuitive judgement.

## Curriculum

### Teaching learning activities of BGS - unique curriculum

The curriculum at BGS is based on the "Multiple Intelligence Mode" Offering a variety of subjects- to cater to varying capabilities among children and enable child to discover his/her aptitudes. The child's caliber is nourished steadily from its roots to promote a natural and lasting growth, rather than adopt 'quick fix' methods, which only produce temporary results, and 'eye-wash I parent impression! The emphasis of the BGS curriculum at all level is on the following:

- Acquisition of Information (Knowledge)
- Application of Theory (Skills)
- Original Presentation (Innovation)
- Behavioral Modification (Values)

**The medium of instruction is English**

### Innovative Teaching-Learning Process

Apart from choosing from a variety of subjects-based on aptitudes, the teaching learning process is so designed to inculcate critical skills that would help students even ten years after their schooling. Students are counseled on the career prospects that would be available to them, when they actually enter the life of competition. The curriculum is more need oriented than market driven. Involving lot of activities rather than the same monotonous lecture method as the mode of giving instruction, studies is fun rather than the age-old tedious job for children. Students will also be trained to be independent in doing their daily chores as well as work related to their own needs.

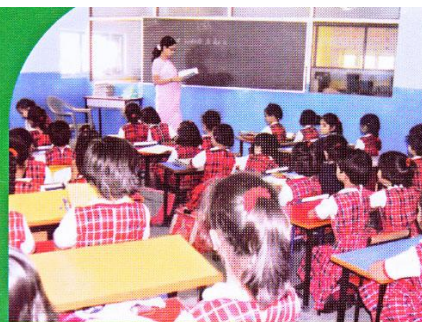

## Evaluation

Psychological development is not uniform across individuals. It occurs at different rates in different persons. Any attempt to fast track this development leads to an early burn out in childhood and an individual may be rendered incapable during his/her later years, keeping this in mind we will not be ranking our children as we believe, child should not be compared but instead, the will to learn should be developed or more precisely said should be able to develop the practical use of knowledge.

BGS follows the system of 'Continuous' and 'multi mode evaluation'. The system of continuous evaluation tests the 'knowledge' of a student and ensures constant academic preparedness the multi-n evaluation system tests the skills and competencies of a student and portrays his/her areas of aptitudes, personality strengths and weaknesses etc.

There are four formative assessments conducted and two summative assessment. These assessments are divided into two terms (In April September and October March). The final evaluation will be the grand total of Term I and II. The students will be given Grades only. As per the CBSE rule of Continuous Comprehensive Evaluation (CCE).

## Our Strength

All our dreams can not be achieved unless they are not guided in the right direction, which is not possible without the support and empathy of the teachers, we have well trained, qualified and dedicated teachers. In the case of children, the act of opening up to keeping this as the base of development of a bonding with the students which help them to come out more confident and independent, we make the students feel at home but without making them lose grip on discipline which they should never forget.

*"That an educator has a duty to teach the curricula but also to teach character"*

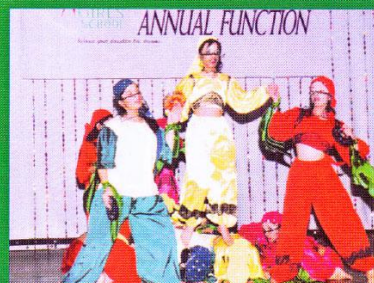

## Other Activities

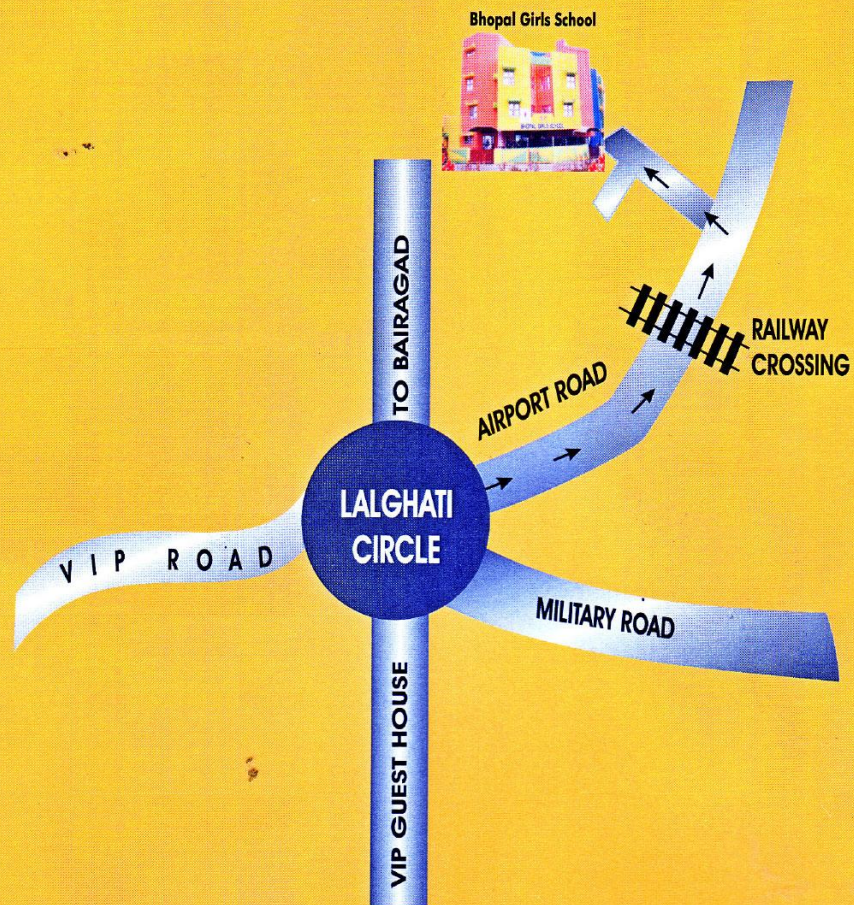

The overall Fitness regime at BGS, which ignites a passion to perform, perfect and achieve. Yoga develops physical flexibility and emotional stability. Training in Martial arts imbues the courage and spirit to fight back. Separate Play facilities and experienced trainers are available for cricket, football, tennis, basketball, volleyball, kabbadi, kho-kho, badminton and also indoor games such as carom, chess, etc.

While games and sports provide manual dexterity, the student club activities during weekends make children mentally agile and organizationally capable! Teams from the four houses compete in areas of self-expression such as debate, quiz, elocution, monoacting, science talk, essay writing, poetry recitation, antakshari, dumb charades, mock interview etc. Trips and excursions will be organized to places of interest to widen the horizon of the students. The cost of all such trips is payable by parents.

Computer Training are provided to all the students from class I and are even planning to get our students clear the certificate courses in the same before they out of the institution. School Calendar will be published every year in the beginning of the session, which will give comprehensive information about the rules and regulations, various activities, tentative dates of the tests and examination as with holidays and vacations etc. for the academic year.
